DETAILED ACTION

Response to Amendment

Applicant's amendment, received 1-29-2007, overcomes the examiner's prior art rejection. Hence claims 1-4, 8-11 and 15-21 are allowed while claims 5-7 and 12-14 are cancelled.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. The claims recite the concept of "open areas" and adjusting the directional sensitivity of the omni-antenna such that it is increased in the direction of an open area to a wireless device that is out of range of said omni-antenna:

"..determining if an open area is present in the vicinity of a wireless device in the wireless mesh network;

if an open area is not present, taking no action to add devices to the wireless mesh network;

if an open area is present, adjusting an antenna sensitivity pattern of the wireless device in the wireless mesh network to exhibit a directional sensitivity pattern having increased range in a direction of the open area in comparison with an omni-directional sensitivity pattern to enable discovery of a wireless device that is out of range of the omni-directional antenna sensitivity pattern;

transmitting a query using the adjusted antenna sensitivity pattern; and
if a response to the query transmitted using the adjusted antenna sensitivity pattern is received from a responding wireless device within a predetermined time period, adding the responding wireless device to the mesh network".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
